EBooks posted since November 2003, with etext numbers OVER #10000, are

filed in a different way. The year of a release date is no longer part of the directory path. The path is based on the etext number (which is

identical to the filename). The path to the file is made up of single digits corresponding to all but the last digit in the filename. For example an eBook of filename 10234 would be found at:

<http://www.gutenberg.net/1/0/2/3/10234>

or filename 24689 would be found at:

<http://www.gutenberg.net/2/4/6/8/24689>

An alternative method of locating eBooks:

The illustration should depict a vintage bookshelf filled with ancient tomes, one of which bears the etext number 10000 or higher, symbolizing the vast collection of eBooks available on the Gutenberg Project website.
